

## **VICTORIA GLEN PARK RESTORATION PROJECT - OCTOBER 2009**

**As part of our continued commitment to environmental stewardship, a group of Capital employees and family members generously volunteered their time on Saturday October 17th, 2009 to assist the Township of Woolwich Environmental Enhancement Committee (TWEEC) in the restoration of Victoria Glen Park in Elmira, Ontario. The predominantly forested 7 acre park with some open space received an upgrade courtesy of our volunteers alongside TWEEC volunteers and members of the local community. The project consisted of the planting of 40 different native species of trees, spreading wood chips along 500 meters of trail that runs through the forest, and the creation of a gravel path for trail users. In appreciation for all the volunteers who worked very hard to complete this project, Capital provided a barbeque lunch and distributed gift trees donated by the Green Legacy tree nursery in Wellington County. At the end of the event, there was a mutual feeling of satisfaction and sense of accomplishment felt by all.**

**Please see the pictures of the event below.**
